Germany - the obvious outlier

Compared to global ranking, Germany has only three out of ten overlapping top skills among the represented countries, which is the lowest. Two out of three skills match the top two of the global rankings - Cloud and Distributed Computing and Statistical Analysis and Data Mining, while the third top skill - SEO/SEM Marketing ranks ninth global on average.

Country Ranking by Skill (dashed line indicates global average rank for skill)

Cloud and Distributed Computing - demand comes with awareness

Where it's included in the list at all, Cloud and Distributed Computing ranks as top skill in all of the represented countries except China. In Australia, Brazil, Canada, Netherlands, South Africa, UAE and United Kingdom it's not in the top 10.

Statistical Analysis and Data Mining - in the top 3 everywhere

All of the represented countries include Statistical Analysis and Data Mining in their top 10 skills list, and all except India and Singapore consider it to be a top 3 skill. All of the countries have it as their top 5.

All of the data was visible from one single dashboard, clicking just highlighted a country, a skill or a combination of both for visibility.
